

FUJI INDUSTRIES CO.,LTD.

Company Profile

▶ Message from President

共に次のステージへ、
信頼できるパートナーとして
**Building partnerships for
technology innovation.**

We are an agile mid-size highly specialized Japanese trading company with a depth of knowledge, experience and achievement in advanced fields such as aerospace materials and high-tech equipment.

This is an era of unprecedented change and business evolution. I believe this is a time when companies with specialized knowledge and global networks are in the best position to succeed, utilizing professionals with an active role in the company's direction.

From a time long ago, the way of writing the Japanese word for “spirit” was derived from observing clouds in the sky. My aim is to encourage business that is inspired by creative energy from the unexpected, which can lead to the advancement of useful products and services. This is my ambition for the new world of global business.

As a company that is brave, patient and always energetic, we will continue to proudly fly high in the sky. I humbly ask for your patronage. Thank you.

Junji Yamada president & CEO

Connecting the world, Japan and the future

Through our trading business, "connecting the world, Japan and the future," we are aiming to be an enterprise that can contribute to society far and wide. In order to realize this vision, we believe in

1. having knowledge of original seeds for the highly specialized fields of advanced technologies, new materials and high-tech equipment,
2. investigating and integrating the explicit and implicit needs in the market, and
3. creating an optimal business environment that makes the best use of an independent global network together with all our partner enterprises.

▶ PRODUCTS

“Global Partner” for your future business and creation

Utilizing our vast supply chain network, we import aircraft parts necessary for manufacturing, repairing, and periodic replacement of aircraft and engines, standard aircraft materials including metal materials, composite materials, chemical products, equipment, etc. from Europe, America and Asia and deliver a wide range of products to airframe manufacturers, engine manufacturers in Japan.

In addition, we offer a full turn key solution for cutting edge automation equipments for airframe structure, automated assembly equipments, various testing and measuring equipment. We also import materials necessary for manufacturing and researching space-related rockets, satellites, and space stations.

Utilizing our vast supply chain network, we import highly specialized materials and precision machined parts required for manufacturing, repair and maintenance of aircraft engines and industrial power generation equipment. We source from overseas markets in Europe, North America and Asia for supply to gas turbine engine manufacturers in Japan.

“Global Partner” for your future business and creation

COMPOSITE MATERIAL

We handle composite materials for manufacturing and repair of aircrafts from European and American manufacturers according to the required standards.

We import and sell advanced products such as composite materials used for manufacturing and repairing aircraft, helicopters, engines, components related to composite materials, tools, etc. from manufacturers mainly in Europe and the United States according to required standards and applications.

PRECISION MACHINE, EQUIPMENT SYSTEMS

We integrate products with cutting-edge technology to support excellence in Japanese advanced manufacturing.

We contribute to reform and efficiency improvements in manufacturing. 3D printers and Additive Manufacturing technology can greatly simplify the supply chain and improve product functionality. Automated layup systems for composite prepreg are at the forefront of realizing full automation in manufacturing equipment. Clean laser is a high-precision system for surface processing that does not require media and creates no waste. Please feel free to contact us for more details.

“Global Partner” for your future business and creation

CHEMICAL EQUIPMENT

We follow through with support for every step, from prototype trials of underwater pelletizing systems to launch of production, and aftermarket service perpetually thereafter.

As the exclusive agent of Gala Industries, Inc. (USA) in Japan for over 40 years, we are specialists in the technical know-how of innovative underwater pelletizing systems for plastic and rubber materials, including centrifugal dryers used in large-scale systems. Responding quickly to technology needs from the chemical, compound coloring and recycling industries, we have a critical role in providing solutions for "prototype testing," "equipment selection," "import/logistics," "installation support," "witness testing" and "technical aftermarket support." Please feel free to also contact us with inquiries for other industry products related to Gala Industries, Inc.

WINE

We are importing premium wines from California and France.

We are handing with highly-reputed wines from California and France. And we have been pursuing new wineries all over the world. In addition, we are holding some events regulaly (Workshop for Sommelier, Tasting Seminar etc.) so as to have profound knowledges and share the pleasure of wines between the participants and us.
